

Genealogical Gleanings in England (Volume I) By Henry F. Waters AM INTRODUCTION
The efforts made by the New England Historic Genealogical Society, through its Committee on English Research, to procure funds sufficient to enable it to make an exhaustive search of the English Records, on a plan never before attempted, for everything which concerns the family history of the early settlers of this country; its great good fortune in securing the services of the eminent antiquary, Henry FitzGilbert Waters; his peculiar qualifications for the task, and the superiority of the method adopted by him, are all set forth in the New England Historical AND Genealogical Register for July, 1883. Mr. Waters sailed for England May 5, 1883, and at once entered upon his great work. The step thus taken was a most important one, and marked a new departure in genealogical research. The notes printed in the Register for July, 1883, were the results of Mr. Waters's first few days work among the records of the Prerogative Court of Canterbury, Somerset House, London. They arrived here barely in time for publication in that number of the Register, and were a foretaste of what was to come. Before a twelvemonth had passed he had accumulated a vast amount of historical and genealogical material, including abstracts of more than six hundred wills relating to American families, and he has since then industriously added to his invaluable collections, until they are now unequalled both in extent and in importance. Some of the results of his researches, under the title of Genealogical Gleanings in England, have been given to the public in the New England Historical and Genealogical Register, the organ of the Society. It has now been deemed advisable to reprint some of these Gleanings in a form more convenient for reference. The present volumes include the various instalments published in the Register from July, 1883, to January, 1899, inclusive. In addition to these genealogical researches, Mr. Waters has made historical discoveries of the highest value. We owe to him the finding of the Winthrop map and the Maverick MS, two of the most important contributions made in our day to our early colonial history. These discoveries excited great attention among historical students, not only in this country, but also in England.

----- Windham Press is committed to bringing the lost cultural heritage of ages past into the 21st century through high-quality reproductions of original, classic printed works at affordable prices. This book has been carefully crafted to utilize the original images of antique books rather than error-prone OCR text. This also preserves the work of the original typesetters of these classics, unknown craftsmen who laid out the text, often by hand, of each and every page you will read. Their subtle art involving judgment and interaction with the text is in many ways superior and more human than the mechanical methods utilized today, and gave each book a unique, hand-crafted feel in its text that connected the reader organically to the art of bindery and book-making. We think these benefits are worth the occasional imperfection resulting from the age of these books at the time of scanning, and their vintage feel provides a connection to the past that goes beyond the mere words of the text.
