

This book is about exploration for oil and gas and focuses particularly on seismic exploration in the hunt for hydrocarbons. The first part, The Hunt for Hydrocarbons, gives general background information, with an introductory chapter on the beginnings of the oil business followed by three chapters that include elements of petroleum geology, geophysical methods, and drilling and logging. The second part, Seismic Exploration for Hydrocarbons, consists of two chapters that describe rudiments of the seismic method and velocity measurements; two chapters discussing theory based on wave propagation and the convolutional model; and a chapter devoted to each of the three phases of seismic exploration: acquisition, processing, and interpretation. I have concentrated on seismic exploration because most of the oil and gas that has been found has been located by this method, and it is the only method that has the potential for the increased precision needed in what Halbouty (1982) calls the deliberate search for the subtle trap. In contrast to elementary and introductory books that present the seismic method superficially and qualitatively, this book develops the method quantitatively, using only elementary mathematics (algebra and trigonometry), so that readers should be able to do things afterwards that they couldnt do before, and thereby get a deeper appreciation of the business of hunting for hydrocarbons. The book also probes into some sophisticated topics that wouldnt be mentioned in short courses at a variety of levels.

i»¿First time read top ebook like Petroleum Exploration: A Quantitative Introduction ebook. I get this book in the internet 4 minutes ago, at October 31 2018. While visitor want a pdf, you should no host a book on hour website, all of file of ebook at tribuneeventsgroupct.com hosted at 3rd party website. No permission needed to load this book, just click download, and a copy of this pdf is be yours. Take your time to try how to download, and you will get Petroleum Exploration: A Quantitative Introduction in tribuneeventsgroupct.com!
